

Notes on Initial Build

1. Responsiveness
 - a. Home page text extends past the white background and the picture is awkwardly placed on the right-hand side
2. Titles
 - a. Margins are really large, so the word wrap of the titles look awkward
3. Schedule Page
 - a. Have a grid with the show's photographs
 - b. Example in the multi-panel page
4. Focus going forward
 - a. Responsiveness
 - i. Things disappear at different sizes, and nothing really moves
 - ii. Game plan for that would just be to work on media queries and width changes
 - b. Main page redo the type and photo on the side to make more sense
